Restylane[®]
Natural beauty from within

*Restylane is a trademark owned by Q-Med AB. All rights reserved.

If you are looking to enhance your looks with a natural substance which achieves a visible, long-lasting esthetic result, Restylane® is made for you.

Whether you're looking for defined facial contours, fuller lips, or smoothed facial lines, Restylane* lets you bring out the best in yourself - instantly and naturally.

What's more, Restylane allows you flexibility. You can choose to have a single treatment, on your lips for example. Or, you could have your lips treated and lines smoothed out - at the same time. As Restylane degrades over time, you have the freedom to do what you want, when you want. You are always in control of your looks - that's the beauty of Restylane.

Natural on the inside

Restylane® is a crystal-clear gel made of stabilized hyaluronic acid. Hyaluronic acid holds water, hydrates and gives volume to the skin. As we get older the distribution of our natural hyaluronic acid diminishes. A simple injection of Restylane replenishes lost skin volume and improves your looks by enhancing your profile, creating fuller lips, and smoothing out lines and wrinkles.

Restylane adds volume to your skin and still leaves your face with a natural expression. Restylane is non-permanent and is absorbed naturally over time. This means that you can choose when to have further treatment to maintain the effect.

Natural on the outside

In less time than a lunch break, you can have a treatment with Restylane and then get on with your usual life. There's no need for any pre-testing and you'll see the result instantly. The effect will typically last 6 months to over a year. The length of time Restylane lasts is specific to each individual, and the area treated.

Already, since its launch in 1996, the Restylane product range has been used safely in over 10,000,000 treatments, in more than 70 countries worldwide – so you can be reassured that it has a proven safety track record.

Natural choice for an instant beauty lift

Restylane® is the ideal treatment for instantly enhancing your looks in a completely natural way. Restylane works from the inside by adding volume. Restylane is not a beauty cream and it is not surgery – it is an instant injectable beauty lift to enhance your looks.

If you'd like to know more about what Restylane can do for you, just ask your practitioner or visit our website, www.restylane.com which gives you the facts and has a Q&A section. You'll soon see why Restylane is a worldwide, leading instant esthetic brand.

The following before and after pictures are examples of what can be achieved when using the Restylane product range. Please visit www.restylane.com for more pictures and details of the esthetic enhancements that have been performed.

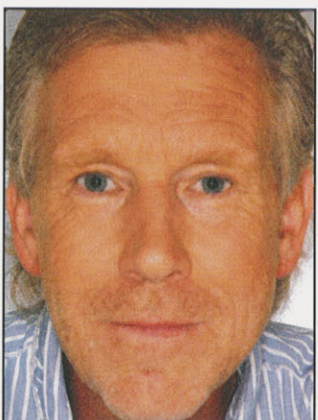

The Restylane logo is written in a blue, elegant cursive script. Below the main brand name, the tagline "Natural beauty from within" is written in a smaller, clean, sans-serif font.
